EDUCATION

Ph.D. in Computer Science

National University of Singapore

📅 Aug 2017 – present 📍 Singapore

B.Eng. in Computer Science

Harbin Institute of Technology

📅 Sep 2010 – Jun 2014 📍 Harbin, China

EXPERIENCES

Research Assistant

Database Lab, School of Computing, NUS

📅 Jun 2016 – Jun 2017 📍 Singapore

Our team was interested in dynamic graph analytics on various applications and was exploring to utilize different hardware hierarchies, e.g., GPU accelerators and their combined architecture, to achieve higher efficiency.

Project Officer

Rolls-Royce@NTU Corporate Lab, NTU

📅 Jun 2015 – Jun 2016 📍 Singapore

I took part in the research project focusing on the automatic vortex extraction and tracking in CFD data, which is an essential tool for the aerodynamic design of Rolls-Royce's jet engine.

Algorithm Engineer

Alibaba

📅 Jun 2014 – Jun 2015 📍 Beijing, China

I was responsible for the backend of the business logic layer of internet advertisement delivery engine, which was mainly related to online user profiling and targeted advertisement indexing, retrieving and recalling.

Software Engineering Intern

Google

📅 Jun 2013 – Nov 2013 📍 Shanghai, China

Our team was in charge of developing the backend transaction logic management of the Demand Side Platform, and my main contribution during the internship was the RetryAction module.
